DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on August 12, 2004 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Patent Number 6,647,468 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the prior art discloses a synchronization variable that is used for synchronization purposes. The operation on it are used to synchronize memory. When synchronization completes, all writes done on that machine are propagated outward and all writes done on other machines are brought on. In other word, all the (shared) memory is synchronized (see, for example, Tanenbaum). Thus the prior art of the record does not teach or fairly suggest overriding synchronization or preventing synchronization among the plurality of devices upon notice that the prior synchronization event has occurred or the memory resource is not to be shared by other processing devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
